

mentorING

Promoting Female Talents

„I was surrounded by extraordinary women in my life who held out and showed me the way. I am the product of other people's mentorship.“ (Michelle Obama)

mentorING is the longest-running as well as one of the most successful mentoring programs for female students at TUM.

mentorING supports you early on to get an insight into the working world. You will be accompanied individually for one year by a mentor from one of our partner companies. Your mentor corresponds with your study focus as well as your professional or personal goals. With your mentor by your side you have the possibility to progress personally and professionally. Furthermore we give you the chance to participate in events, where you will be able to meet other mentees and mentors, and to broaden your network.

Information for your application

You are:

- A female student at TUM
- At least in the third semester of your Bachelor studies

Submit your application until the 19th of October 2020!

The **mentorING** program starts at the beginning of the winter semester.

For further information and to access the application form, please follow the link:

One-on-One Mentoring

You will be accompanied individually for one year by a mentor from one of our partner companies. We make sure that he or she corresponds with your study focus and your professional goals. Your mentor supports you in your own personal development during your **mentorING** -year.

Networking

You jointly undergo the **mentorING**-program with the other mentees. Our regular events pose the perfect opportunity to talk to your fellow students as well as mentors. This is your chance to establish new contacts as well as a professional network.

Professional Qualification

mentorING offers you the possibility to participate in interesting seminars and workshops. They include topics such as life and career planning, leadership skills or work-life balance. A highlight is our job application training: Theoretical input and practical exercises help you to prepare for divers situations during an application process.

Personal Development

mentorING also offers you the possibility of personal development. In cooperation with your mentor you get to reflect your strengths and opportunities. Your mentor helps you to define personal goals realistically and supports you with the right tools to reach them.

Program Content:

Kick-off Event

Introductory Workshop
Getting to know your mentor

Determination of Personal Position and Goals
